

V SAI PURANDHARA

Software Engineer II | Full Stack Developer (Java Spring Boot + React JS)

Mumbai, Maharashtra, India • (+91) 9064563812 • purandhara999@gmail.com

[LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with **3+ years** building and supporting enterprise-scale web applications and portals using **Java Spring Boot** and **React JS**. Comfortable owning both backend (RESTful APIs, Spring Boot, JPA/Hibernate ORM, Oracle with stored procedures) and frontend (React JS, jQuery) as part of a single product. Hands-on with **secure development practices** — remediating findings from Black Duck, Coverity, and Twistlock — **CI/CD via GitHub Actions & Octopus**, **API gateway management with APIGEE**, and functional/UI test automation using **Selenium**, **Katalon Studio**, **JUnit** and **Jest**. Experienced across the full Scaled Agile SDLC — requirements, design, coding, integration testing, and verification & validation — as an ownership-driven member of a Scrum team.

TECHNICAL SKILLS

Languages	Java (primary), JavaScript, TypeScript, SQL / PL-SQL, Bash
Backend / J2EE	Spring Boot, J2EE, Spring MVC, Spring Security, Spring Data JPA, Spring Batch, Spring Cloud, Hibernate
Frontend / UI	React JS (Hooks, Redux), jQuery, Angular, HTML5, CSS3, SASS, TypeScript
APIs & Gateway	RESTful Web Services, APIGEE API Gateway, GraphQL, SOAP, JMS
ORM & Databases	JPA / Hibernate, Oracle (Stored Procedures, PL/SQL), PostgreSQL, MySQL, MongoDB, Redis
Testing / Automation	JUnit 5, Jest, Mockito, Selenium, Katalon Studio, TestNG, TDD, Integration Testing
Security Scan Tools	Black Duck, Coverity, Twistlock, SonarQube
CI/CD & Build	GitHub Actions, Octopus Deploy, Maven, Gradle, Jenkins, Docker, Kubernetes, OpenShift
Messaging / Async	Apache Kafka, RabbitMQ, Solace, Event-Driven Architecture
Version Ctrl & Tools	GitHub, Git, Bitbucket, JIRA, SAFe / Agile-Scrum, Postman, Grafana, Splunk

WORK EXPERIENCE

Software Development Engineer

Feb 2023 — Present

Jio Platforms Limited

Navi Mumbai, India

- **Full-Stack Return Management Platform (JioMart)**: Developed enterprise-scale web application features end-to-end — **Spring Boot** RESTful APIs backed by **JPA/Hibernate** over **Oracle (stored procedures/PL-SQL)** and PostgreSQL, with **React JS** and **jQuery** front-end screens. Achieved sub-50ms response times via Redis TTL caching, processing millions of transactions. Acted as SME for production incidents, resolving critical tickets and minimising SLA breaches.
- **Compliance Microservice (RPOS/ROMS)**: Built a message-oriented Spring Boot service automating GSTIN validation, IRN generation, and E-way bill creation — cutting manual effort by 40%. Exposed and secured services through the **APIGEE API Gateway** (routing, rate limiting, key management) and used Kafka/RabbitMQ for async, fault-tolerant processing.
- **Secure Development**: Integrated **Black Duck**, **Coverity**, and **Twistlock** scans into the delivery pipeline; triaged and remediated open-source, static-analysis, and container vulnerability findings to meet enterprise Cyber Security compliance.
- **CI/CD & Release**: Automated build, test, and deployment using **GitHub Actions** and **Octopus Deploy**, delivering zero-downtime rolling updates to Kubernetes/OpenShift.
- **Test Automation & V&V**: Wrote backend unit tests with **JUnit 5**/Mockito and front-end tests with **Jest**; automated UI / system integration testing with **Selenium** and **Katalon Studio**, raising regression coverage and release confidence.
- **Security Framework (Pentagon)**: Hardened authentication across 10+ microservices using Spring Security, OAuth2, and JWT-based RBAC; implemented token-refresh flows and route guards in React/Angular front-ends.
- Worked in a **Scaled Agile (SAFe/Scrum)** team — requirements, design, code reviews, integration testing, and process improvement — collaborating with Operations, Infrastructure, and Cyber Security; mentored junior engineers on REST design and SDLC best practices.

Content Reviewer

Oct 2022 — Feb 2023

Tech Firefly Pvt. Ltd.

India

- Reviewed and validated digital content for accuracy, quality, and adherence to client guidelines, maintaining consistency and high data integrity across large review volumes.

Production Engineer

Oct 2017 — Jan 2019

Essel Propack Ltd.

India

- Supported production operations using SAP in a large-scale FMCG manufacturing environment; assisted in issue tracking, escalation, and technical documentation.

KEY PROJECTS

JioMart Return Management Platform — Java, Spring Boot, React JS, jQuery, JPA/Hibernate, Oracle, PostgreSQL, Redis, APIGEE, GitHub Actions, Octopus, Kubernetes

- Full-stack return lifecycle: RESTful & GraphQL APIs with Redis TTL caching for sub-50ms latency, Oracle/PostgreSQL persistence, and React JS/jQuery UI; owned requirements, design, testing, and GitHub Actions + Octopus CI/CD with release/rollback plans.

Compliance Automation Service (RPOS/ROMS) — Java, Spring Boot, Kafka, RabbitMQ, APIGEE, OpenShift, Terraform

- Automated GSTIN/IRN/E-way bill workflows via external GST APIs behind an APIGEE gateway; led feasibility and estimation, and built an Angular/React ops dashboard with real-time SLA indicators.

Deep Learning Sentiment Classifier — Python, PyTorch, Flask, scikit-learn, HuggingFace

- Trained a binary sentiment classifier on 50,000 IMDB reviews (EmbeddingBag + MLP), 88–90% accuracy; deployed as a Flask REST API — end-to-end ownership from training to production service.

EDUCATION & CERTIFICATIONS

B.E. — Engineering , The Institution of Engineers (India)	CGPA 8.67	<i>Jan 2019 — Jul 2022</i>
Diploma in Engineering , Technique Polytechnic Institute	82.3%	<i>Jun 2014 — Nov 2017</i>
Full Stack Java Developer Master's Program , Simplilearn	Certification	<i>Feb 2022 — Aug 2022</i>
