

V SAI PURANDHARA

Software Engineer | Java · Spring Boot · Python ML/AI · AWS

Mumbai, Maharashtra, IN | (+91) 9064563812 | purandhara999@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience designing, developing, and maintaining high-quality **Java / J2EE and Spring Boot** applications for large-scale enterprise platforms at Jio Platforms. Strong grounding in **core Java, object-oriented programming, and data structures & algorithms**, combined with hands-on **Python ML/AI** experience using Deep Learning frameworks to build, fine-tune, and evaluate models in production. Skilled in **AWS cloud services**, RESTful API design, CI/CD, code reviews, and clear technical documentation. A collaborative team player experienced in working with cross-functional and distributed teams to deliver reliable, scalable, and performant software on time.

TECHNICAL SKILLS

Core Java & J2EE	Java 17, J2EE, OOP, Multithreading, Collections, Exception Handling, Data Structures & Algorithms
Frameworks	Spring Boot 3, Spring Framework, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Spring AI
Python & AI/ML	Python 3, PyTorch (Deep Learning), scikit-learn, HuggingFace Transformers, Sentence-Transformers, Model Training / Fine-Tuning & Evaluation, RAG Pipelines
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes (K8s), PaaS/OpenShift, Jenkins, CI/CD, UNIX/Linux
Messaging & APIs	Apache Kafka, JMS, RabbitMQ, RESTful Web Services, GraphQL, SOAP, Event-Driven Architecture
Databases	Oracle, MySQL, PostgreSQL, MongoDB, Redis
Frontend	Angular (RxJS, NgRx), React.js (Hooks, Redux), Node.js, TypeScript, JavaScript, HTML5, CSS3
Tools & Practices	GitHub, Git, Maven, Gradle, JUnit 5, Mockito, TDD, SonarQube, Postman, JIRA, Agile/Scrum, Code Reviews

WORK EXPERIENCE

Software Development Engineer

Jio Platforms Limited

Jan 2023 – Present

Navi Mumbai, India

- Java / Spring Boot Microservices:** Designed, developed, and maintained high-quality RESTful microservices in Java 17 and Spring Boot for JioMart's e-commerce return lifecycle, processing millions of transactions with sub-50ms response times via Redis caching and Oracle/PostgreSQL persistence; deployed on **Kubernetes/AWS** through **Jenkins CI/CD** with zero-downtime rolling updates.
- Python ML/AI & Deep Learning:** Built Python AI features integrating Generative AI (Spring AI + Ollama/Mistral) and trained/fine-tuned models for semantic search over 13,900+ SKUs using Sentence-Transformers and a self-supervised classifier, raising catalogue coverage from 2.4% to 93% and improving inference latency 50× (5s → 100ms).
- Event-Driven Systems:** Architected message-oriented services automating GSTIN validation, IRN generation, and E-way bill creation on **Apache Kafka and JMS/RabbitMQ**, cutting manual processing by 40% with fault-tolerant async pipelines.
- Security & Quality:** Hardened 10+ microservices with Spring Security, OAuth2, and JWT-based RBAC; actively participated in **code reviews**, applied data structures and algorithms to optimise performance, and authored clear **technical documentation** for design and APIs.
- Collaboration & Delivery:** Worked closely with senior developers, QA, and cross-functional teams in Agile/Scrum to design and implement new features; performed testing and debugging, and provided ongoing production support and troubleshooting to ensure robust, defect-free releases.

Essel Propack Ltd.

- Supported production operations using SAP in a large-scale FMCG manufacturing environment; assisted in issue tracking, escalation, and technical documentation.

PROJECTS

Deep Learning Sentiment Classifier — Python, PyTorch, Flask, scikit-learn, HuggingFace

- Built a binary text sentiment classifier from scratch in PyTorch (EmbeddingBag + MLP); achieved 88–90% accuracy on 25,000 held-out IMDB reviews with early stopping, LR scheduling, gradient clipping, and Xavier initialisation.
- Deployed as a Flask REST API (/predict, /batch, /health) returning confidence scores — demonstrating end-to-end ownership from model training and evaluation to a production service.

AI Inventory Intelligence Platform — Python, Sentence-Transformers, ChromaDB, Java Spring Boot, FastAPI, React

- Engineered multilingual semantic search and a self-supervised auto-classifier over 13,900+ SKUs, exposing 768-dim vector search via a Spring Boot REST API decoupled from the ML layer.
- Raised catalogue semantic coverage from 2.4% to 93% with zero manual synonym rules; delivered a React query UI with instant autocomplete and Hindi/English support.

Enterprise Voice-Commerce Assistant — React, TypeScript, Node.js, Google Gemini, Ollama (Llama 3)

- Developed a full-stack multilingual voice shopping assistant achieving 95% intent accuracy across 10+ Indian languages via a dual-LLM routing strategy and a phonetic resolution engine mapping 10,000+ colloquial terms to SKUs.
- Delivered <1.5s end-to-end latency with live speech-to-text and instant SKU lookup, eliminating manual synonym maintenance.

EDUCATION

The Institution of Engineers (India)

Jan 2019 – July 2022

Bachelor of Engineering (Mechanical)

CGPA: 8.67

Technique Polytechnic Institute

June 2014 – Nov 2017

Diploma in Engineering

Score: 82.3%

CERTIFICATIONS

Full Stack Java Developer Master’s Program — Simplilearn

Nov 2022 – Jan 2023
